

Short Introduction

Airport-CDM App

Airport-CDM App

Airport Collaborative Decision Making

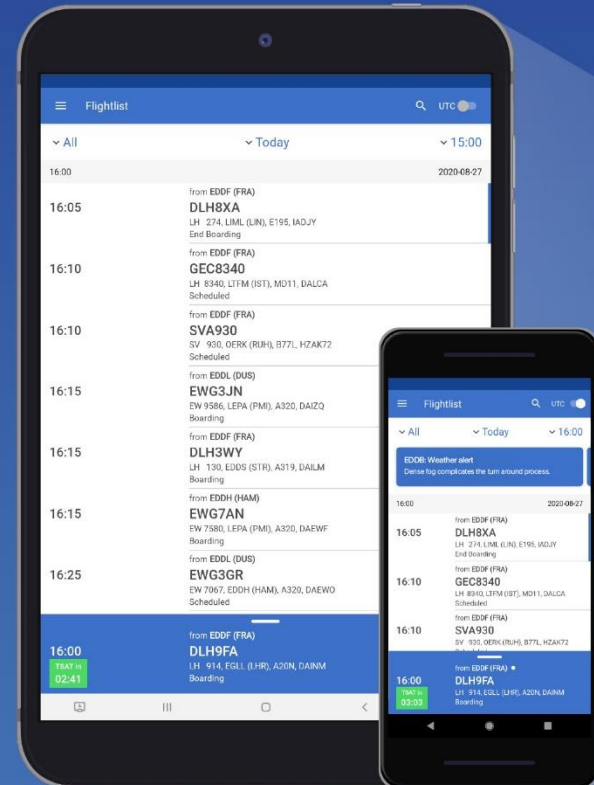

Multiple source database for a-cdm process partners.
In the right place at the right time

BER FLUGHAFEN
BERLIN
BRANDENBURG

Hamburg Airport

Düsseldorf
Airport **DUS**

Frankfurt Airport

- Platform for all A-CDM process partners (exclusively aimed at the target group, not for private use)
- Providing real-time data to pilots and ground handlers
- Effectiveness due rapid reaction capabilities
- Free of charge usage

Airport-CDM App

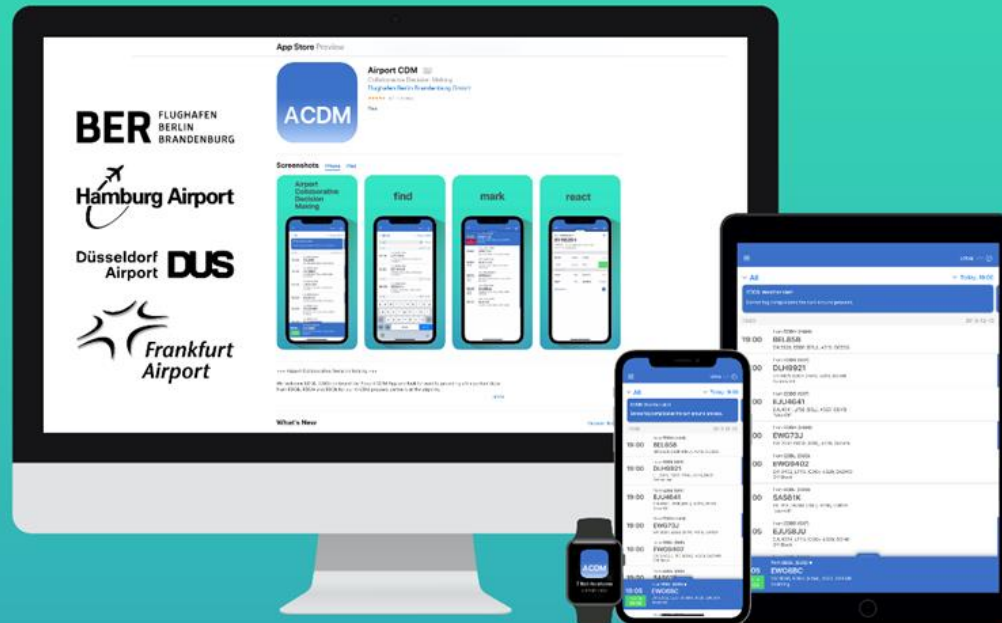

Supporting efficient air
traffic in Germany and
Europe

Free download in English and
German
Search keyword: Airport CDM

In UTC or local time

Airport Collaborative Decision Making

Airport CDM App
Multi airport data aggregator
for A-CDM process partners.

Airport-CDM App

- Publisher of the app is Berlin Airport (Flughafen Berlin Brandenburg GmbH)
- Constantly growing number of European CDM Airports
- If A-CDM time stamps change, the app will inform visually and via push messages

Welcome onboard

Keep an eye on the time

Airport Collaborative Decision Making (A-CDM) is an operational approach for handling an optimal turnaround at airports. It is a continuous process from flight planning to landing and turnaround on the ground to aircraft take-off.

This app provides data on milestones such as TOBT, TSAT and deicing as well as further relevant information on the A-CDM process of noted departures.

Only for process partners

This offer is only intended for operating partners of the participating airports and is not intended for passengers or private use.

Mark

Mark any number of departures and always know the current milestones.

Favourite

Never lose sight of your prioritised flight. Choose for yourself!

Tips

We do everything to prevent technical malfunctions on the app. If there are any, you'll know immediately.

Your airport

We are continuously expanding the scope of participating A-CDM airports.

Universal Time

All times can be displayed as local device times or as Coordinated Universal Time (UTC). UTC can be recognized by the "z", which is appended to the times.

Up to date

If there are changes in the A-CDM timestamps, we will inform you visually by push message.

Latest milestones

The TOBT and TSAT are presented immediately in the watchlist after availability and highlighted for the favourite with a countdown.

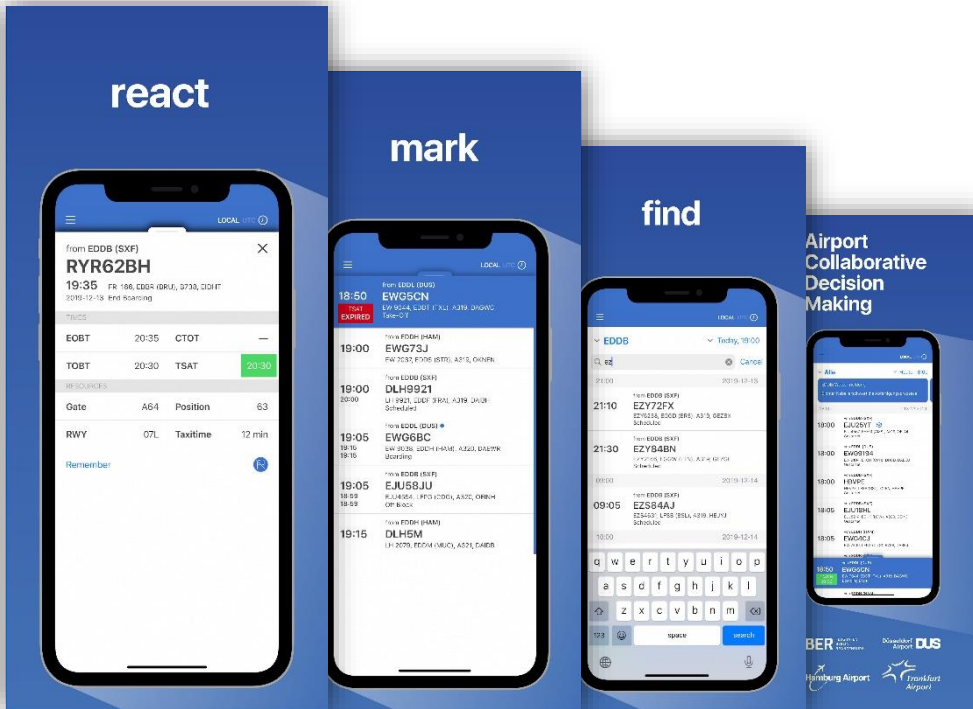

Ice-free

The process is extended by deicing. You will be informed immediately in which way.

Product Features

- **All-in-one:** Any number of CDM Airports in just one frontend
- **Onboarding** tutorial to become familiar with the app
- Integration of a carefully phrased **data privacy statement**
- All flights of every participating CDM Airport in one **complete list**
- **Real time data** from airport's air traffic management systems
- **Filter options** per airport
- High-performance **search**
- **Bookmarking** of unlimited numbers of flights
- **Summary** of all bookmarked flights in one additional list
- Highlighting of the first bookmarked flight as „**your favourite**“
- Colour-coded **TSAT countdown**
- Detailed **flight information** inkl. **EOBT, CTOT, TOBT, TSAT, De-icing data** plus general **airport information**
- Aligned set of rules of **push notifications** via smartphone messaging

Evolution of App Participants

The „A-CDM Germany“ airports support the Airport-CDM App professionally and with (further planned) participation

Already integrated airports:

EDDB (SXF) – Pilot Project 2016

EDDH (HAM) – Go Live 2018

EDDL (DUS) – Go Live 2019

EDDF (FRA) – Go Live 2020

Planned integration:

EDDS (STR) – Go Live expected in 2022

EDDM (MUC) – Go Live expected in 2022

Updates

We regularly develop new functions for the app and maintain our offer by adding improvements and corrections.

We hope this app is a valuable support for the turn-around process.

Feedback

We would be pleased to receive your feedback in the form of criticism, suggestions and praise. Please contact us at:

feedback@a-cdm.info

Good luck

We wish our users efficient and trouble-free handling processes at all times.

We hope we can help.
